HOW TO BORROW EBOOKS WITH:

What you will need to begin:
- Charged device
- Oceanside Library Card
- Apple ID & Password (iOS)
- WiFi or Cellular Network

iOS & Android

1. On your iOS device (iPad or iPhone) or Android device (Samsung tablet, smartphone, etc.), you may begin by connecting to a WiFi network and opening your App Store.
2. Search the App Store for the "Libby, by Overdrive" app and download. If using iOS, enter your Apple ID & password if prompted.
3. Open Libby and follow the prompts to sign in, entering "Oceanside Library" and library card number. You may be prompted to identify library and library card number more than once.
4. Once you're logged in, tap "Library" on the bottom left to search or browse the collection. The collection consists of both eBooks and audiobooks, so be sure to select the item in the correct format.
5. When you find a title, tap "Borrow" beneath the book cover. If the title is currently unavailable, you can choose "Place a Hold" to add the item to your hold list.
6. If the book is available, it will be added to your shelf instantly. Tap "Shelf" on the bottom right to view your current loans and your holds.

If you would like to learn more about how to use Libby, click the Libby icon on the top right and tap "Learn Libby" to view video tutorials.

All eBooks will be returned automatically when the loan period expires. You can extend your loan in the app only if there is no waitlist for the item.
