

Electric Air Pump for Inflatable Pool Toys (AC 110-120V, 400W) Manual

Product Overview: - High-power electric air pump for inflating and deflating air mattresses, pool floats, gymnastic mats, rafts, and other inflatables. - AC 110-120V, 400W power input. - Portable and lightweight design. - Comes with 4 nozzle attachments to fit a variety of inflatables.

Included in the Box: - Electric air pump unit - 4 nozzle adapters - AC power cord - User manual

Operating Instructions: 1. **Select Nozzle:** Choose the nozzle that fits your inflatable's valve. 2. **Attach Nozzle:** Insert nozzle securely into pump outlet. 3. **Plug In:** Connect the AC power cord to a standard 110-120V outlet. 4. **Inflate:** Turn the switch to the "Inflate" mode. Place nozzle into inflatable valve and inflate until desired firmness. 5. **Deflate:** Switch to "Deflate" mode to remove air from your inflatable quickly. 6. **Power Off:** After use, switch to "Off" and unplug from outlet.

Safety Instructions: - Do not leave pump unattended while operating. - Keep away from water or damp surfaces. - Do not block the air outlet. - Allow the pump to cool down after prolonged use. - Use only for inflatables compatible with the pump's airflow and pressure.

Maintenance: - Wipe the pump exterior with a dry cloth. - Store in a cool, dry place. - Avoid dropping or exposing to extreme temperatures.

Tips for Best Use: - Use correct nozzle size for optimal inflation. - Avoid over-inflating items to prevent damage. - Allow air pump to rest during continuous long inflation sessions.
